

Sussex County Municipal Utilities Authority - Solid Waste Complex Administration Building

Lafayette, New Jersey

The two story Administration Building wing was constructed for the purpose of housing the administrative offices for the Authority.

The Administration Building was designed as an extension to the then existing Service and Maintenance Building, also designed by Crane, and encompasses a total floor area of approximately 7,000 square feet including general offices, commissioner's conference room, data management room, accounting room, executive lunch and lounge room, and toilets facilities. The facility includes a passenger elevator and is fully accessible in accordance with ADA requirements.
